EDUCATION

Harvard University

Cambridge, MA

A.B. with a Concentration in Computer Science, Secondary in Statistics

Sep. 2025 – Present

- **Honors/Awards:** Jane Street FOCUS 2026, YaleHack 2026 Track Winner, Hack@Brown 2026 Track Winner

EXPERIENCE

Software Engineer Intern

Feb. 2026 – Aug. 2026

Parable Security

Cambridge, MA

- Built an adaptive security-training module which converts phishing emulation failures into LLM generated personalized coursework with graded quizzes and attempt history to provide admin insights
- Identified and diagnosed a critical API error that prevented the program from changing models, fixed by parsing response to determine outcome
- Formally pitched to technical and nontechnical audiences to gain real world feedback, influencing the future development of the product

Software Engineer

Sep. 2025 – May 2026

Harvard Computer Society Tech for Social Good

Cambridge, MA

- Collaborated in a selective, project-based program to build and ship an inventory tracking system for a local nonprofit
- Developed a React table component with a search bar updating URL parameters to display and categorize item information and transaction history tracking with CSV exporting
- Utilized Recharts to graphically display and integrate PostgreSQL data for admin restocking insights

Discovery Program Data Analyst

Sep. 2025 – Dec. 2025

Harvard Undergraduate Data Analytics Group

Cambridge, MA

- Selected for program focused on applied data science and machine learning for client-based analytics projects
- Utilized Python for data analysis, including libraries such as NumPy, pandas, and Matplotlib for data manipulation and visualization
- Engineered an NLP pipeline to quantify Airbnb reviews for sentiment insight

Future of Intelligence Fellow

Sep. 2025 – Dec. 2025

Harvard Undergraduate Machine Intelligence Community

Cambridge, MA

- Engaged in a fellowship to explore cutting-edge architectures, including convolutional neural networks for computer vision, transformers for LLMs, and diffusion models for generative AI
- Collaborated with a team to develop a self-learning assistant through CrewAI

PROJECTS

terminalSpotify | *C++, C, CMake, OpenSSL, Spotify API, Git*

- Developing a command-line tool to allow users to interact with Spotify from the terminal
- Implementing OAuth 2.0 flow with PKCE in C++20, enabling secure token exchanges

Personal Portfolio | *React, Next.js, TypeScript, HTML/CSS, Xterm.js, Docker, Git*

- Developed a React web app to display both professional and personal interests to the public
- Practiced expressive UI/UX design with a terminal interface, ASCII art, and Matrix-style animation
- Implemented continuous integration/deployment through GitHub Actions and Docker Hub to seamlessly update live website

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript, HTML/CSS

Frameworks/Libraries: React, Next.js, pandas, NumPy, Matplotlib, Xterm.js, CPR, httpLib

Concepts: Linear Algebra, Discrete Math, Data Structures and Algorithms, Machine Learning, UX/UI Design, Web Development
